

Modern Attachments: Addressing eDiscovery & Compliance Blind-Spots

The Humpty Dumpty Question

With the prolific use of SharePoint, OneDrive, Box, DropBox, and countless other services, modern attachments are more of a challenge than ever.

The Humpty Dumpty question asks:

- Can we find all relevant data fragments?
- Are those fragments complete or are they missing crucial information?
- Is the original context and integrity of the data preserved during recovery?

Putting Some Pieces Back Together

With CloudLocker, your archived email is scanned for Modern Attachments.

With our analytics, you can gain insight into:

- Who has sent or received modern attachments
- What service they reside on
- Whether they are internal or external
- If they are still accessible
- File Type

Why Choose CloudLocker?

Cost-effective SaaS subscription

Encrypted at-rest and in-transit

Eliminate unruly PSTs from
your environment

Improve eDiscovery
response times

Ease of use

Anytime, anywhere access
to legacy data

Low cost, rapid migration
service with no data limits

Industry standard data
export options

ISO/IEC 27001 certified
