

Archive Former Employee Data

Paying for terabytes of storage when your archived user accounts only need a fraction is an unnecessary expense. CloudLocker's easily scalable storage capacity and volume-based pricing can be more cost-effective than Google's Archive User Licenses, saving thousands of dollars a year.

Enterprise Plus Use Case

Using cloudlocker for archiver user data is best for for companies not using all of the storage space allocated with their Google Workspace license.

2000
archive users

100 GB
average usage per user

\$20,000+
annual savings

More Than Just an Storage

Google Archive User licenses focus on simply storing data. CloudLocker offers much more - without having to leave the platform.

- ✓ custom retention policies
- 📅 automatic expiry
- 🔒 place legal hold
- 👤 assign to matters
- 🔍 deep search indexing

Maintain Compliance

Why is there a need to archive former employee data? Whether an employee left of good terms or was terminated, their data needs to be properly archived.

Legal requirements, industry regulations, and internal policies all impact how former employee data is archived.
