cloudlocker

Managed Platform-as-a-Service

Empowering IT, compliance, and legal teams to manage legacy email and file archives in the cloud with precision, scalability, and cost efficiency. Designed for secure, lighting-fast deployment in your own tenant, Cloudlocker ensures full control, seamless integration, efficient eDiscovery, and audit-ready compliance.

The Challenge

Organizations need to retain and access legacy email data for regulatory, legal, and operational needs. Traditional solutions often lack flexibility and control, involve complex extractions, and have never-ending, large year-over-year cost increases. They also require heavy computing resources and include functionality that exceeds actual business requirements, adding unnecessary complexity and expense.

The Solution

Managed PaaS ensures you remain in control of *your* infrastructure. Data lives in *your* tenant through seamless integration with Azure or AWS.

- Scalable Storage: Azure Blob & S3-compatible services
- Flexible Deployment: Full SaaS, Hybrid Storage, or your Azure/AWS
- Searchable Metadata: Fast search with full EML file control
- Cost Optimization: Up to 50–70% savings vs. traditional licensing
- Upgrades + Patching: fully managed via change control process

Architecture

- **Cloud-native Architecture**: Enables scaling and efficient resource utilization
- **Blob Storage & S3 Buckets**: Provide secure, compliant data retention
- **Managed Identity & Key Vaults**: Ensure zero-trust access and audibility
- **API-Driven Integration**: Supports ingestion from Exchange, Google Workspace, and legacy archive formats

Compliance + Governance

- Support for regulatory frameworks:
  - HIPAA
  - GDPR
  - SEC 17a-4
  - FINRA
- WORM Storage Available
- Audit logs to maintain chain-of-custody reporting

Use Cases

Email Archive Migration: Simplify legacy transitions

Legal Hold & eDiscovery: Targeted search & export

Cost Reduction: 50% + reduction in archiving costs

Multi-Tenant Support: Ideal for MSPs & enterprise IT

Expiry Management: Delete eligible data to reduce costs

No Data Lock-In: Neutral EML format for easy migration

Direct Export: Integrate Relativity and Microsoft Purview
